

City Council Work Session
February 21, 2023

Work Session started at 2:30pm

Councilmembers present: Cindy Stelten, Jody Orbeck and Kyle Christensen; Steven Dahlager (tried to connect virtually) and Karla Davis absent

Others present: Chad Koren, Mike Schindler, Travis Peterson and Dave Blommel

Those present looked at an overview of the current location of the fire hall and property and where the proposed public works building would sit onsite. Also discussed was moving city offices to the same location – could they be connected to the public works building or the fire hall or would they all be separate buildings?

Council meetings would remain at the current City Hall

Any additional buildings constructed on that site would need to be east and south of the back garage doors of the fire hall so as to not interfere with trucks entering/exiting

Dave will check with the architect on projects that he's been involved in for ideas and cost estimates

The workshop ended at 4:30pm

Respectfully submitted by Nicole Pilarski
