Upcoming Regular Council

Meetings

June 3rd
July 1st
August 5th
September 9th & 23rd
October 7th & 21st
November 12th
December 2nd & 16th

June Recycling Days:

4th & 18th

City Hall will be closed:
Wednesday June 19th in
observance of Juneteenth

JUNETEENTH

Celebrate Freedom

JUNE 19

June 2024

The City's Consumer Confidence Report is Online

Your drinking water comes from a groundwater source: two wells ranging from 48 to 59 feet deep, that draw water from the Quaternary Water Table aquifer. Kimball works hard to provide you with safe and reliable drinking water that meets federal and state water quality requirements. The purpose of this report is to provide you with information on your drinking water and how to protect our precious water resources. Contact Travis Peterson – Public Works Lead, at 320-980-4906 or travis.peterson@ci.kimball.mn.us if you have questions about Kimball's drinking water. You can also ask for information about how you can take part in decisions that may affect water quality.

The U.S. Environmental Protection Agency sets safe drinking water standards. These standards limit the amounts of specific contaminants allowed in drinking water. This ensures that tap water is safe to drink for most people. The U.S. Food and Drug Administration regulates the amount of certain contaminants in bottled water. Bottled water must provide the same public health protection as public tap water.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

This report contains our monitoring results from January 1 to December 31, 2023.

We work with the Minnesota Department of Health to test drinking water for more than 100 contaminants. It is not unusual to detect contaminants in small amounts. No water supply is ever completely free of contaminants. Drinking water standards protect Minnesotans from substances that may be harmful to their health.

Learn more by visiting the Minnesota Department of Health's webpage [Basics of Monitoring and testing of Drinking Water in Minnesota \(https://www.health.state.mn.us/communities/environment/water/factsheet/sampling.html\)](https://www.health.state.mn.us/communities/environment/water/factsheet/sampling.html).

Groundwater supplies 75 percent of Minnesota's drinking water, and found in aquifers beneath the surface of the land. Surface water supplies 25 percent of Minnesota's drinking water, and is the water in lakes, rivers, and streams above the surface of the land..

The Minnesota Department of Health provides information about your drinking water source(s) in a source water assessment, including:
How Kimball is protecting your drinking water source(s);
Nearby threats to your drinking water sources;
How easily water and pollution can move from the surface of the land into drinking water sources, based on natural geology and the way wells are constructed.

Find your source water assessment at [Source Water Assessments \(https://www.health.state.mn.us/communities/environment/water/swp/swa\)](https://www.health.state.mn.us/communities/environment/water/swp/swa) or call 651-201-4700 between 8:00 a.m. and 4:30 p.m., Monday through Friday.

You may view this entire report at <http://www.ci.kimball.mn.us/consumerconfidencereport>

Print copies of the report can also be requested by contacting City Hall.

REMINDER!

If you received a letter from the City regarding your water meter and plumbing lines and have not gotten back to City Hall reach out to us as soon as you are able. The EPA (Environmental Protection Agency) put out a state wide mandate for the city to comply and so we are asking for your help in this matter.

If you did not receive the letter, you are in the clear!
NO NEED TO REACH OUT

***** THE City's Brush & Compost Site has opened for the season *****

*** This location and services are provided for CITY RESIDENTS ONLY ***

We ask that you only put items in there that are no longer than 4 ft and diameter of 3 inches or less.

NO STUMPS OR BIG LOGS!!!
